

Hello I'm **Evren Shah.**

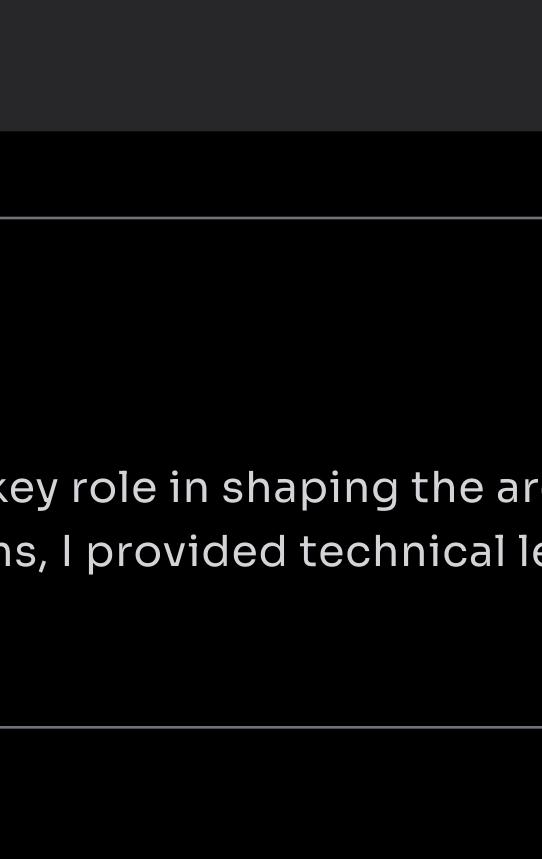

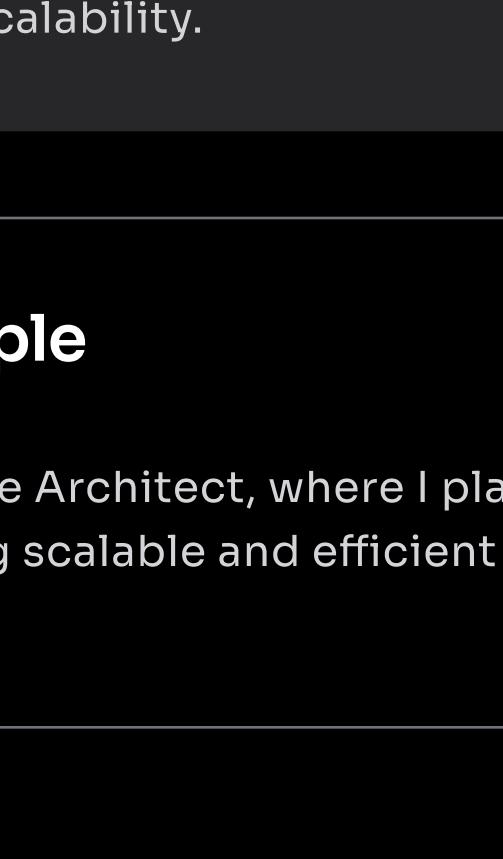

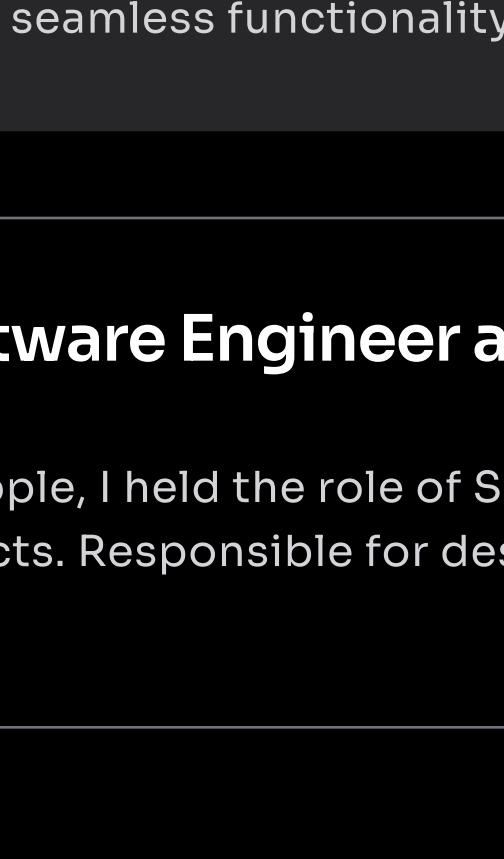

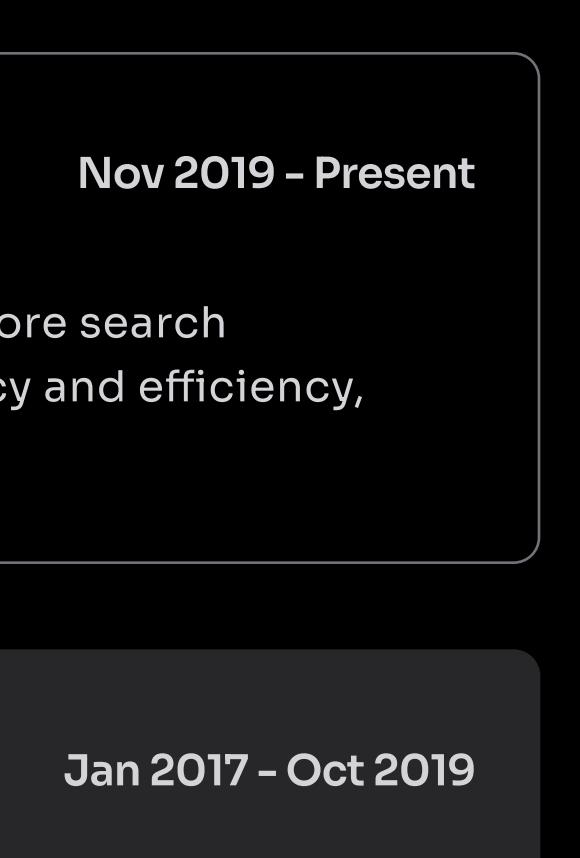

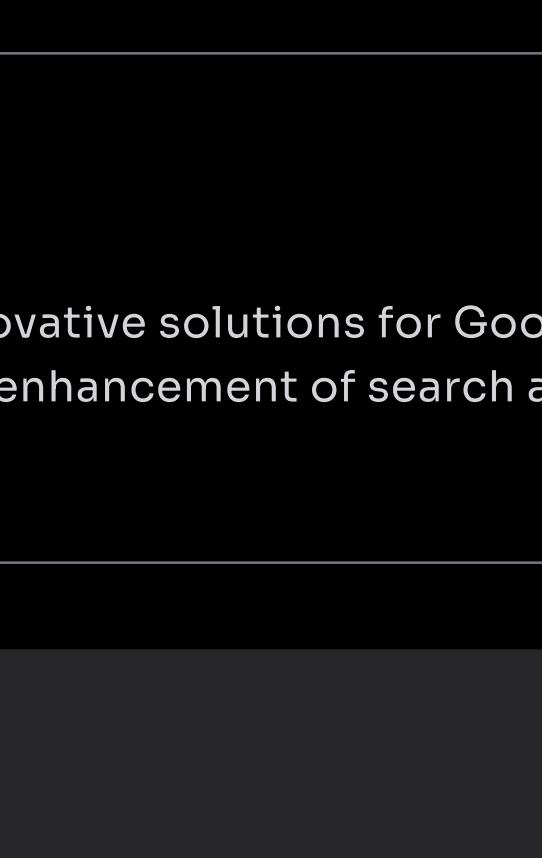

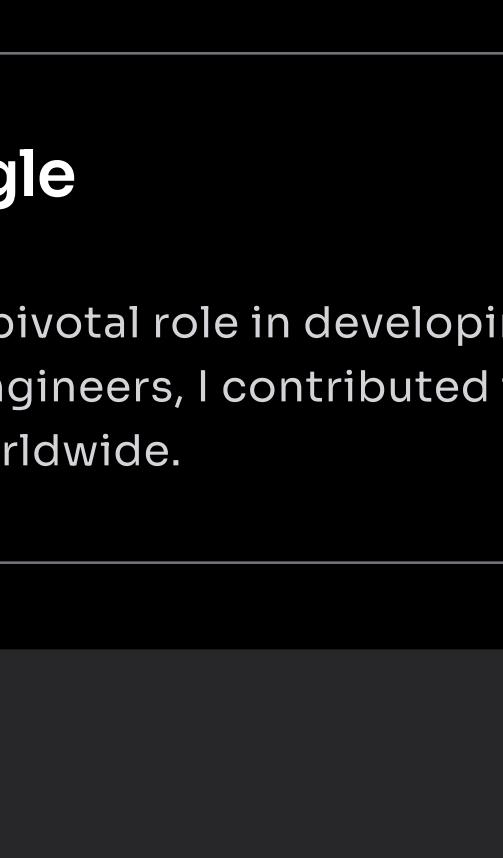

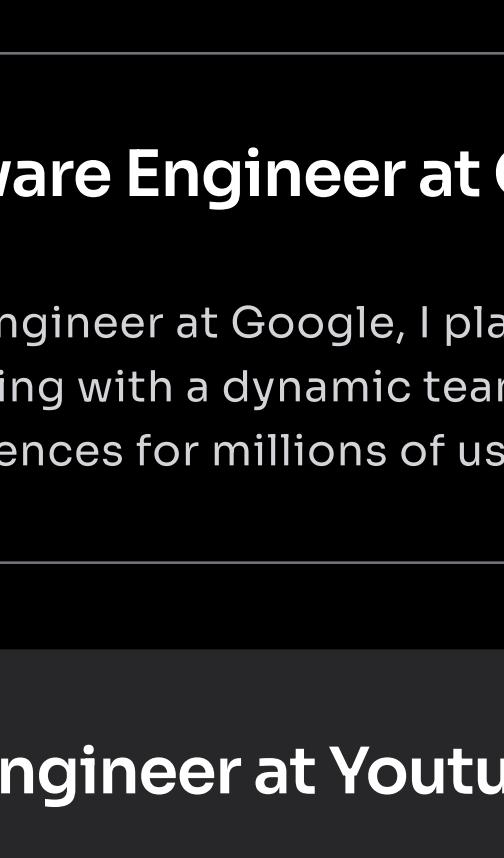

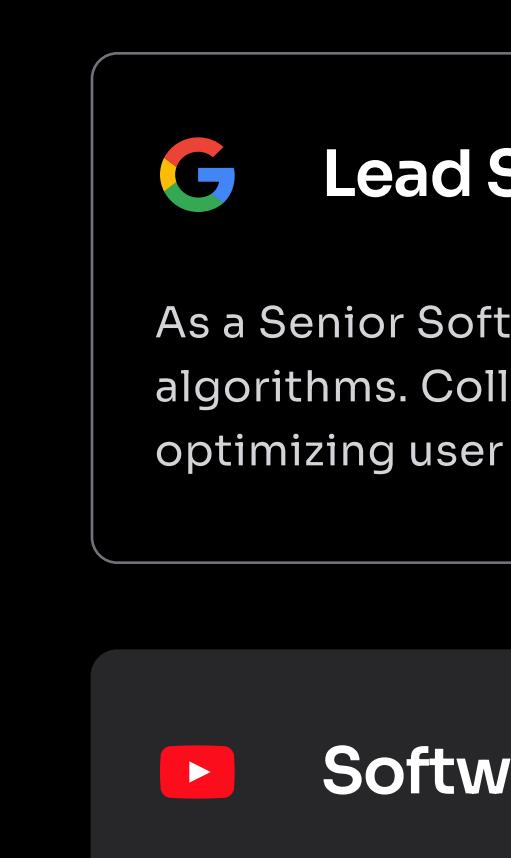

Frontend Developer

Based In India.

I'm Evren Shah Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to specimen book.

My Skills

My Experience

G Lead Software Engineer at Google

Nov 2019 - Present

As a Senior Software Engineer at Google, I played a pivotal role in developing innovative solutions for Google's core search algorithms. Collaborating with a dynamic team of engineers, I contributed to the enhancement of search accuracy and efficiency, optimizing user experiences for millions of users worldwide.

YouTube Software Engineer at YouTube

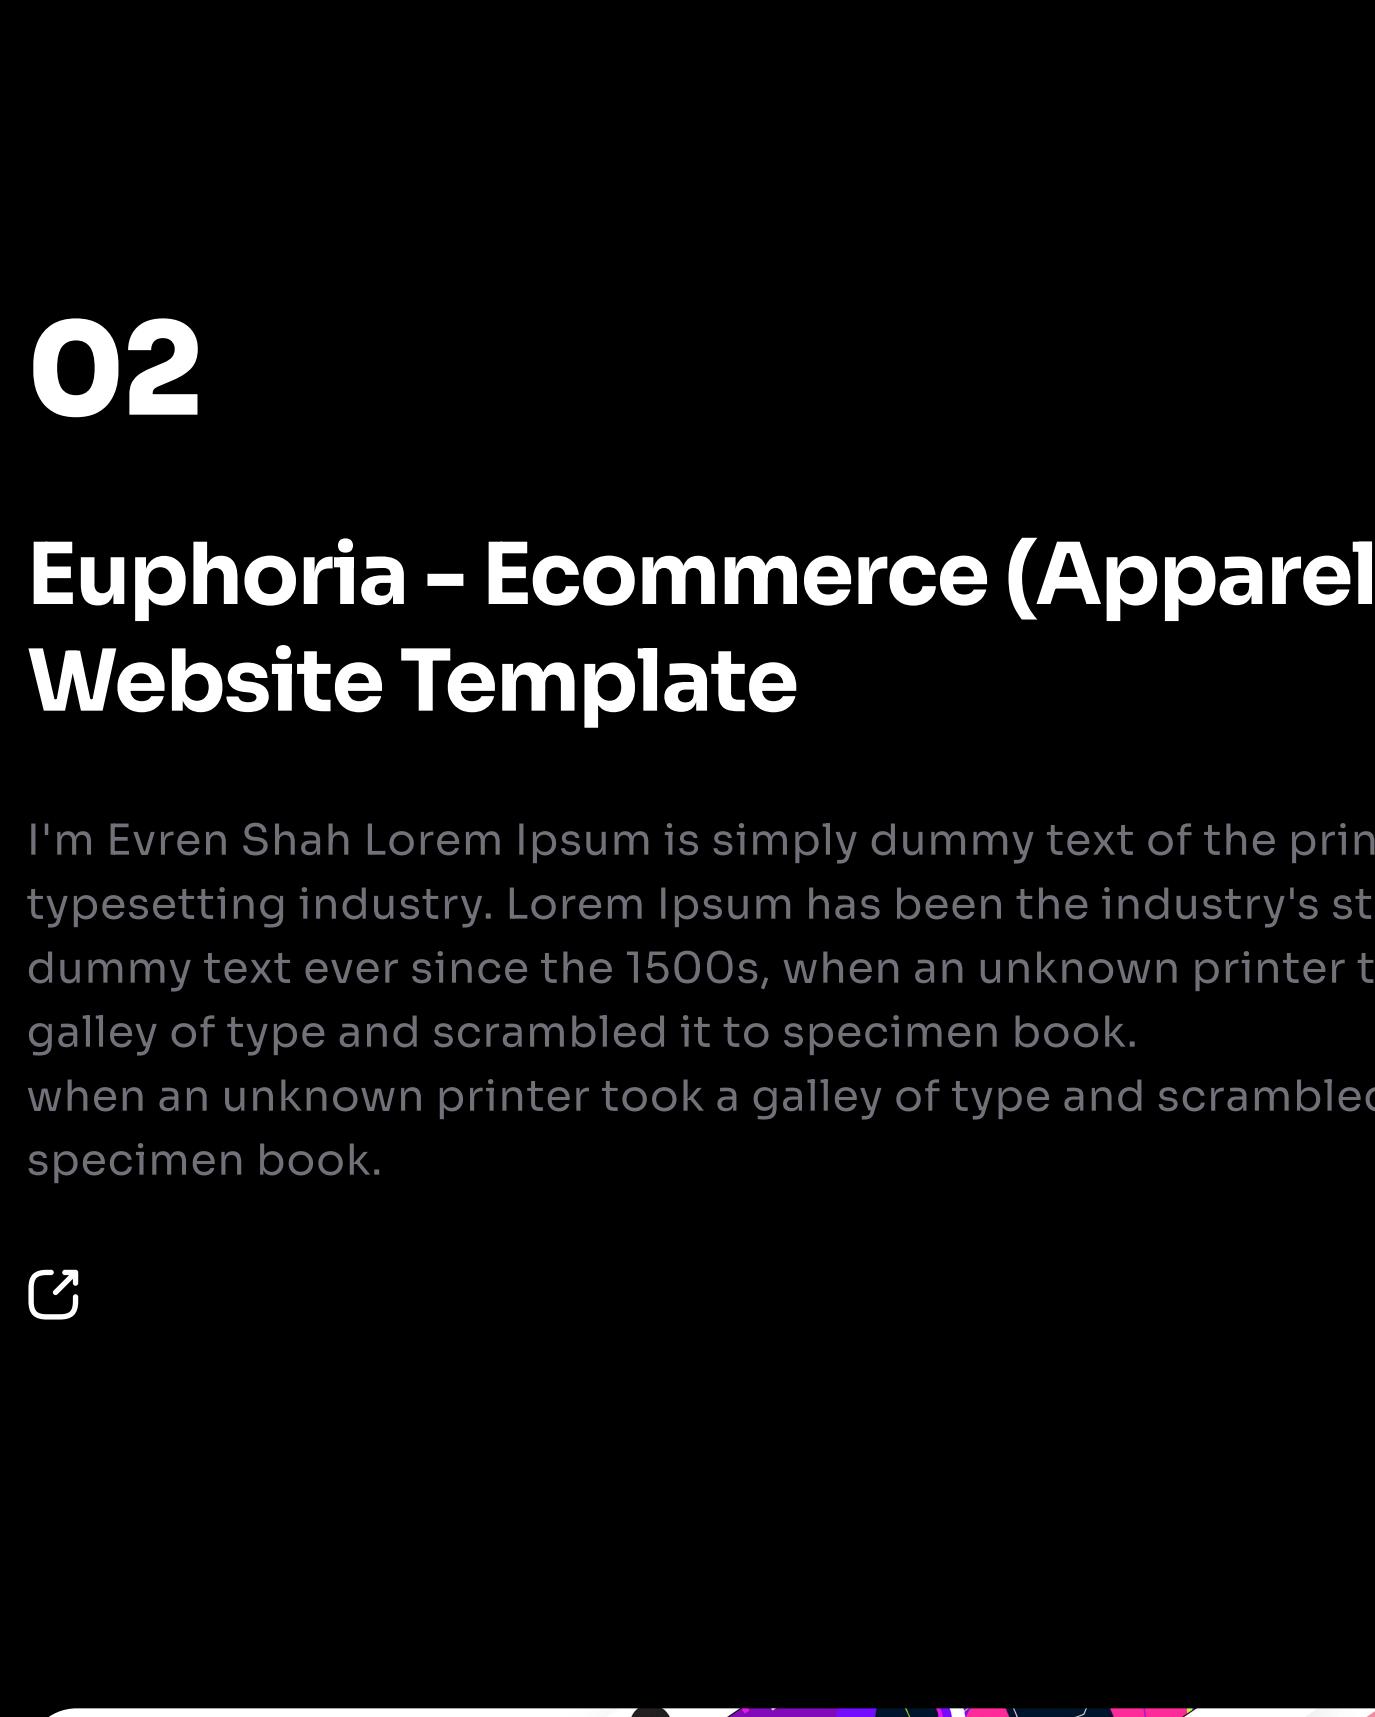

Jan 2017 - Oct 2019

At YouTube, I served as a Software Engineer, focusing on the design and implementation of backend systems for the social media giant's dynamic platform. Working on projects that involved large-scale data processing and user engagement features, I leveraged my expertise to ensure seamless functionality and scalability.

Apple Junior Software Engineer at Apple

Jan 2016 - Dec 2017

During my tenure at Apple, I held the role of Software Architect, where I played a key role in shaping the architecture of mission-critical software projects. Responsible for designing scalable and efficient systems, I provided technical leadership to a cross-functional team.

About Me

I'm a passionate, self-proclaimed designer who specializes in full stack development (React.js & Node.js). I am very enthusiastic about bringing the technical and visual aspects of digital products to life. User experience, pixel perfect design, and writing clear, readable, highly performant code matters to me.

I began my journey as a web developer in 2015, and since then, I've continued to grow and evolve as a developer, taking on new challenges and learning the latest technologies along the way. Now, in my early thirties, 7 years after starting my web development journey, I'm building cutting-edge web applications using modern technologies such as Next.js, TypeScript, Nestjs, Tailwindcss, Supabase and much more.

When I'm not in full-on developer mode, you can find me hovering around on twitter or on indie hacker, witnessing the journey of early startups or enjoying some free time. You can follow me on Twitter where I share tech-related bites and build in public, or you can follow me on GitHub.
